

CYBERCLASS

Participante: Luis Ramon Reyes Volquez

Facilitador: Kevin Feliz Henríquez

Técnico: Ciberseguridad

Módulo: Shell Scripting

Actividad: Reto Cross-site scripting de Portiswagger

Descripción: Este es un paso a paso de como resolver los retos de la pagina web Portiswagger.

Link de GitHub: <https://github.com/elchecho3000-blip/Ciberseguridad-bootcamp/tree/main/Portswigger>

En primer lugar ingresamos con nuestras credenciales en la plataforma web

The screenshot displays the PortSwigger web platform interface. At the top, the browser address bar shows 'portswigger.net'. The PortSwigger logo is on the left, and a 'MY ACCOUNT' button is on the right. The main content area features a large image of a man on the left and a dashboard for 'Burp Suite' on the right. The dashboard includes a 'Sites' list, a 'Current issues' donut chart, a 'Recent scans' table, and a 'Issue count over time' line graph.

Luego, clickeamos en “Academy”, luego presionamos en “All content” y luego en “All labs”

The screenshot shows the PortSwigger Academy website. The top navigation bar includes the PortSwigger logo, a 'MY ACCOUNT' button, and links for Products, Solutions, Research, Academy, and Support. Below this is a secondary navigation bar with links for Dashboard, Learning paths, Latest topics, All content, Hall of Fame, Get started, and Get certified. A dropdown menu is open under 'All content', showing 'All labs', 'All topics', and 'Mystery labs'. The main content area features a large banner with the text 'Free, online web security training from the creators of Burp Suite' and a 'View your progress' button. The background of the banner has a hexagonal pattern and a flask icon.

Lab: Reflected XSS into HTML context with nothing encoded

APPRENTICE

LAB

Solved

This lab contains a simple reflected cross-site scripting vulnerability in the search functionality.

To solve the lab, perform a cross-site scripting attack that calls the `alert` function.

ACCESS THE LAB

Solution

1. Copy and paste the following into the search box:

```
<script>alert(1)</script>
```

2. Click "Search".

Community solutions

En el siguiente buscador pegamos el código que nos suministraron y pulsamos "Search"

Reflected XSS into HTML context with nothing encoded
